

REJECT THE EXCE\$\$IVE SEVEN

NY Health Act (S.5474/A.6058) This bill would eliminate the current system of health care coverage in New York State and substitute it with a multi-billion dollar, government-run single payer system paid for by the state's taxpayers.

All-Electric Building Act (S.6843-C/A.8431-B) This bill would prohibit the construction of all buildings that are not all-electric by 2027. This will drive up the cost of electricity across the state and put residents in danger of power outages, potentially life threatening during the winter.

Extended Producer Responsibility (S.1185-C) (A.10185) This bill would shift the burden of transferring end of life packaging materials from municipalities to "producers" which is loosely defined and includes manufacturers of these types of products, as well as companies who import, use or sell these types of products.

Indexing Minimum Wage (S.3062-B/A.7503) This bill would raise the minimum wage annually by a percentage that is based on

inflation. The new wage will be the current minimum wage increased by the June-June rate of inflation as measured by the consumer price index for all urban consumers.

Anti-trust Bill (S.933-A/A.1812-A) This bill would alter New York State General Business Law's provisions regarding anticompetitive practices. The central terms are left undefined and the language is unreasonably ambiguous, it would leave reasonable people uncertain as to what conduct is permissible and which is prohibited under the Act.

Employee Lien (S.2762/A.766) This bill would permit an employee to file an employee's lien against an employer's interest in real and personal property for an alleged wage claim.

Good Cause Eviction (S.3082/A.5573) This bill would essentially establish a universal rent control model. The bill would cap rent increase at 3 percent a year or one- and one-half times the annual percentage change in the Consumer Price Index, whichever is greater.
